

SAADIA NAEEM

Artificial Intelligence Undergraduate | Agentic AI & Multi-Agent Systems

Haripur, Pakistan | +92 303 8009441 | sadianaeem060@gmail.com | [linkedin.com/in/sadia-naeem-74334126a](https://www.linkedin.com/in/sadia-naeem-74334126a)

PROFESSIONAL SUMMARY

Artificial Intelligence undergraduate with hands-on experience in Agentic AI, Multi-Agent Systems, Backend Development, Computer Vision, and Web3. Skilled in building AI agents and intelligent workflows using LangChain, LangGraph, Model Context Protocol (MCP), Python, Django, PostgreSQL, Docker, and modern AI frameworks. Experienced in developing scalable backend systems, AI-powered Virtual Try-On solutions, and blockchain applications. Passionate about building production-ready AI products that solve real-world problems.

TECHNICAL SKILLS

AI & Agentic AI: Agentic AI, Multi-Agent Systems, LangChain, LangGraph, Model Context Protocol (MCP), LLM Applications, Prompt Engineering, Workflow Automation, Machine Learning, Deep Learning, Computer Vision, NLP

Programming Languages: Python, JavaScript, C++, PHP, SQL, HTML/CSS, Solidity (Basic)

Frameworks & Libraries: Django, TensorFlow, Scikit-learn, OpenCV, NumPy, Pandas, Matplotlib, BeautifulSoup

Backend & Databases: REST APIs, JWT Authentication, PostgreSQL, SQLite, Database Design, API Integration

Blockchain & Web3: Solidity, Ethereum, Smart Contracts, Foundry, Remix IDE, RainbowKit, Wagmi, Viem, Wallet Integration

Tools: Docker, Git, GitHub, MCP Servers, Linux, VS Code, Jupyter Notebook, vercel

PROFESSIONAL EXPERIENCE

AI Developer Intern | *Rapidev, NSTP, NUST*

June 2025 – Aug 2025

- Researched and developed Agentic AI and multi-agent systems.
- Built AI workflows using LangChain, LangGraph, and MCP for tool integration and automation.
- Developed browser-based AI applications and deployed them using Docker.
- Contributed to Pashto transcription and NLP workflows for low-resource languages.
- Collaborated on intelligent AI solutions integrating LLMs, external tools, and APIs.

Backend Developer Intern | *Rapidev, NSTP, NUST*

July 2024 – August 2024

- Developed backend services using Python, Django, and PostgreSQL.
- Built REST APIs and implemented JWT authentication.
- Designed secure and scalable backend architectures.

Software Development Intern | *NRTC Group of Companies*

July 2023 – August 2023

- Assisted in developing LARTOS, an AI-powered defense software.
- Worked on testing, debugging, and software implementation.

FEATURED PROJECTS

AI Tutor — Final Year Project

Agentic AI Learning Assistant

- Building an AI tutor using LangChain, LangGraph, MCP, and LLMs.
- Implementing AI agents for personalized learning, reasoning, memory, and task planning.
- Developing a scalable backend for student progress tracking and AI interactions.

Albaheej Eyewear — AI Virtual Try-On

- Built an AI-powered eyewear platform using Django and PostgreSQL.
- Developed Virtual Try-On, face shape detection, and personalized frame recommendations using Computer Vision.
- Implemented authentication, product management, and image enhancement.

Fund Me DApp (Web3)

- Developed a decentralized crowdfunding application using Solidity and Ethereum.
- Integrated RainbowKit, Wagmi, and Viem for wallet connectivity.
- Implemented secure smart contracts for deposits and owner withdrawals.

Other Projects

- Face Shape Prediction & Image Enhancement
- Rain Prediction & WhatsApp Alert System
- Blood Bank Management System
- E-Commerce Backend System
